## I. Results of Vacuum/Pressure Monitoring Equipment Testing

This page should be used to document testing and servicing of vacuum and pressure interstitial sensors. A copy of this form must be included with the Monitoring System Certification Form, which must be provided to the tank system owner/operator. The owner/operator must submit a copy of the Monitoring System Certification Form to the local agency regulating UST systems within 30 days of test date.

How was interstitial communication verified?					
Vacuum was restored to operating levels in all interstitial spaces: Yes No (If no, describe in Sec. J, below)					

## J. Comments: \_\_\_\_\_

\_\_\_\_\_\_

<sup>&</sup>lt;sup>1</sup> If the sensor successfully detects a simulated vacuum/pressure leak introduced in the interstitial space at the furthest point from the sensor, vacuum/pressure has been demonstrated to be communicating throughout the interstice.
